SUMMER CAMPS 2024

A summer of adventure

An extraordinary summer awaits at International School San Patricio Toledo's exclusive summer camps. Choose from Robotics and Gaming, Sports, Photography and Visual Arts, or Languages, meet like-minded peers from across the globe, and enjoy first class facilities as you immerse yourself in local Spanish culture and have the time of your life.

An **inspired** school

WELCOME

You haven't experienced a summer camp until you've experienced an International School San Patricio Toledo summer camp. Supported by a skilled team of professional monitors (Spanish or English), every camper will leave with enriched communication skills (speaking, writing, listening, and reading) and an inner confidence they will carry forever.

Designed specifically for children aged 1-17yrs, it's here that talents are nurtured, lifelong friendships are forged, and where everyone can enjoy first class facilities that include an outstanding Visual Arts centre, a professional photography dark room, a high-performance indoor triathlon pavilion, and indoor and outdoor swimming pools.

All offer the ideal location to get the appetite of any budding sports person or creative mind alike! While allowing campers, novices or experts, to turn their hand to a multitude of activities such as, athletics, basketball, swimming (both indoor and outdoor) and more!

WHAT TO EXPECT

This programme is designed for children who want to explore the world of robotics, mechanisms and the creation of video games. They will build on their design and development while immersing themselves in an experience in English and Spanish.

MORNING OPTION: ROBOTICS AND GAMING

Immerse yourself in the world of gaming and robotics at our camp, where innovation takes centre stage! Here, participants delve deep into the captivating realm of video games, learning to design, build, and fine-tune their gaming experiences.

But that’s not all – our camp goes beyond gameplay. Participants unravel the intricate mechanisms behind their creations, gaining hands-on experience in prototyping. They become the architects of their own gaming worlds, mastering the art of game design and development.

Join us for an adventure where gaming and robotics collide, offering a unique opportunity to craft your own video games and unravel the mysteries of the technology that powers them. It’s a journey where creativity meets engineering, and the possibilities are limitless!
